Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status of the Claims

Claims 1-3 and 5-9 are pending and the subject of this Office Action.

Applicants' arguments, filed on 26 March 2007 have been fully considered and are, in part, deemed to be persuasive regarding previous rejection.

Rejections and objections not reiterated from previous office actions are hereby withdrawn. Upon reconsideration of the pending claims, as presented, the following new rejections are applied. They constitute the complete set of rejections being applied to the instant application presently.

The Office acknowledges Applicants' amendments to the present set of claims and given Applicants' omission of acarabose from the claim set. To further prosecution, the Office has proceeded therefore, with the examination of the additional species disclosed, including miglitol, emiglitate, and voglibose.

Claim Rejections – 35 U.S.C. §103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any

Art Unit: 1614

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3 and 5-9 are rejected under 35 U.S.C. 103(a) as being obvious over U.S. Patent No. 5,840,705 [hereinafter referred to as "Tsukada et al"] in view of U.S. Patent No. 6,143,787 [hereinafter referred to as "Moint et al"] as evidenced by the teachings in U.S. Patent No. 6,107,329 [hereinafter referred to as "Hoover et al"]. The teachings of Tsukada et al and Moint et al disclosed in the Office Action filed on 26 November 2006, along with the motivation provided to combine these references and all other pertinent arguments therein are incorporated herein by reference, in total.

As noted by Applicants, Tsukada et al teach acarbose as the antidiabetic useful in the treatment of non-insulin dependent diabetes. However, it is well-known by those of skill in the art that other α -glucosidase inhibitors, including acarbose, miglitol, emiglitate, and voglibose (Abstract and Col. 13, lines 36-53, specifically, but the reference in total), may be used interchangeably as antidiabetic agents to treat diabetes.

In light of the foregoing, it would have been prima facie obvious to one of ordinary skill in the art at the time that the invention was made to combined acarbose and 2-benzyl-4-(4-fluorophenyl)-4-oxobutanoic acid in a 1/1 weight ratio for treating non-insulin dependent diabetes to result in the pharmaceutical composition of the present invention with a reasonable expectation of success.

Conclusion

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
